📄 PROFILE

I'm Elvis T. Harmon, a passionate Software Engineer and Fullstack Developer dedicated to leveraging technology to solve real-world problems. I hold a BSc in Computer science and have developed innovative software solutions to help people achieve their goals. My drive to empower others led me to create a software tool that simplifies tasks and improves lives. With strong technical skills and a problem-solving mindset, I strive to make a meaningful impact through my work. I am committed to using my expertise to build solutions that drive positive change.
